# PROPAGATION

## fertil pot®

Fertilpots are 100% organic and biodegradable pots composed primarily of wood fibers and are sustainably manufactured without the use of glues or binders.

They are truly biodegradable and are intended to be planted directly in the ground or a larger container (there is no need to tear the bottom off the pot first).

Unlike rice-hull pots, starch-based polymers and other 'biodegradable' plastics, Fertilpots do not require a composting situation to biodegrade.

All retail products are packaged using Biodegradable plastic or paper packaging.

**BULK RANGE AVAILABLE ON REQUEST.**

## FERTILPOT RETAIL PACKS (ECO PACKAGING)

Code	Dimensions (CM)	Qty per Pack
261.00	6 x 6cm Round	18
299.00	7 x 9cm Round	10
284.16	5 x 5cm Square Strips (4 strips x 15 pots)	60

## FERTILPOT INDIVIDUAL (UNPACKAGED)

Code	Dimensions (CM)	Qty per Pack
500.03L	4.5 x 7cm Round Individual	each
501.13L	5 x 9cm Round Individual	each
504.03L	6 x 6cm Round Individual	each
509.03L	7 x 9cm Round Individual	each
510.03L	8 x 8cm Round Individual	each
513.13L	10 x 10cm Round Individual	each
519.03L	11 x 11cm Round Individual	each
516.03L	10 x 18cm Round Individual	each
580.13L	18 x 16cm Round Individual	each

## FERTILPOT NT INDIVIDUAL (UNPACKAGED)

The next generation of organic biodegradable pots.

Award winning design includes a moulded pot lip, smoother surface finish and layout for improved structural strength and greater durability. Greater compression is used during manufacture offering extended propagation times and ease of use in automated systems.

Code	Dimensions (CM)	Qty per Pack
591.03L	10.5cm Diameter, 0.6L	each
592.00L	12cm Diameter, 0.9L	each
593.00L	14cm Diameter, 1.15L	each

## POT & PROPAGATION TRAYS

All our thermoformed PE trays are designed for use with our biodegradable Fertilpots or on their own. Their design promotes air pruning of the root tips emerging from the porous walls of the Fertilpot.

The Dioni tray is a new concept in the use and handling of biodegradable containers. Developed jointly by Fertil International and Desch Plantpak, the Dioni tray encourages superior airflow around the pots for better root formation. The design of the Dioni tray provides an air space between the Fertilpot wood fiber pot and the plastic cell wall. This will promote air pruning of the root tips emerging from the porous walls of the Fertilpot.

The vented Dioni tray is designed to allow a grower to pre-load the tray with empty pots and stack them for filling in a flat filler at a later time. The unique design of the tray prevents jamming of the tray above into the pots in the layer below.

Because Fertilpot wood fiber pots are more permeable to roots than traditional peat pots, the results obtained using a Dioni tray with Fertilpots will exceed a standard tight fitting plastic tray holding peat pots.

### AVAILABLE EMPTY OR PRE-LOADED.

Code	Dimensions (CM)	Qty per Pack
T500	4.5 x 7cm - 50 Cell Propagation Tray	each
T501	5 x 9cm - 50 Cell Propagation Tray	each
T28	6 x 6cm - 28 Cell Propagation Tray	each
T166.18	Dioni 7 x 9cm - 32 Cell Propagation Tray	each
T167.15	8 x 8cm - 20 Cell Propagation Tray	each
T500L	4.5 x 7cm - Fertilpot Pre-loaded 50 Cell Tray	each
T501L	5 x 9cm - Fertilpot Pre-loaded 50 Cell Tray	each
T28L	6 x 6cm - Fertilpot Pre-loaded 28 Cell Tray	each
166.18L	7 x 9cm - Fertilpot Pre-loaded 32 Cell Tray	each
167.18L	8 x 8cm - Fertilpot Pre-loaded 20 Cell Tray	each

## SEED & MICROGREEN TRAYS

Our seed trays are available in 2 sizes and are ideal for propagating seeds and microgreens. The grid system allows water to pass through ensuring the seeds don't get waterlogged when used in conjunction with a growing media such as our wool biomats.

The rectangular channeled seed tray is designed to work with the rectangular seed tray and provide a reservoir for excess water.

Code	Dimensions (CM)	Qty per Pack
TRX550	Seed Tray Channeled Rectangular 55x28x6cm	each
TR540	Seed Tray Rectangular 54x27x6cm	50

## FERTILPOT PEAT PELLETS

Fertil Peat Growing Pellets are made from sustainable peat moss, with a minimal amount of wood pulp, all compressed into a pellet.

By just adding water, the pellet will expand up to seven times it's original size to become a perfect self contained pot with it's own growing medium for starting seeds.

A fine netting allows the roots of the seedling to penetrate as the plant grows and ensures air circulation and water exchange.

Code	Dimensions (CM)	Qty per Pack
848.10	Fertil Peat Pellets 36mm (Bagged)	25
848L	Fertil Peat Pellets 36mm (Individual)	each

# ECOFELT GROW BAGS

## ECOFELT GROW BAGS

EcoFelt Grow bags/planters are made from recycled water bottles (BPA Free) and can be used as a permanent or moveable planter. They are soft-sided containers filled with soil and able to hold growing plants.

They are great for growing vegetables (tomato's, potatoes, peppers, etc), herbs, annuals, house plant, etc.

The flow of fresh air to the roots prevents soil pathogens and mold from getting established.

EcoFelt Grow bags are inexpensive, lightweight, reusable, eco-friendly and durable. In addition, they reduce the need for repotting.

Code	Dimensions (CM)	Qty per Pack
FGB15	Round 15 x 18cm (4L) Black	5
FGB20	Round 20 x 18cm (7.5L) Black	5
FGB25	Round 25 x 22cm (11L) Black	5

FGB96	Round 96 x 50cm (368L) with handles Black	2
FGBV30	Round 28 x 26cm (19L) Black	5

## ECOFELT GIANT GARDEN BAGS

Code	Dimensions (CM)	Qty per Pack
FGB96	Round 96 x 50cm (368L) Black with handles	2

## ECOFELT GROW POCKETS

Code	Dimensions (CM)	Qty per Pack
FGP4H	4 Wall Pockets Horizontal 20 x 60cm (Small)	5
FGP4V	4 Wall Pockets Vertical 60 x 20cm (Small)	5
FGP4VL	4 Wall Pockets Vertical 28 x 95cm (Large)	5
FGP7VL	7 Wall Pockets Vertical 23 x 100cm (Large)	2

## SEED SOAK

Seed Soak is a pre-germination soak suitable for organics. It improves strike rate and quality of growth in seeds by helping to penetrate the outer seed coating and accelerate growth.

Benefits include: Higher germination rates in seeds achieved and generally faster germination results. Accelerated leaf growth and number of leaves. Better root development and plant strength.

Code	Dimensions (CM)	Qty per Pack
BBSS	Seed Soak Pre-Germination 250ml	30

# FLOURISH BIOSTIMULANT

## Flourish Organic Biostimulant

Flourish is an organic, biostimulant that allows for better nutrient uptake by plants through their roots.

Strengthen your plants health, vitality and resilience by applying Flourish to the soil around the plant. It helps aid improved nutrient uptake and exchange at the roots for better plant health and vitality.

Recommended as the main soil conditioner for all organic horticulture, including vegetables, fruits, flowers and herbs, etc.

### BENEFITS:

- Improves your plants health, vitality and nutrient uptake through the roots.
- Stimulates soil fertility and micro-organism nutrient exchange.
- Reduces water cluster value by 1/3 improving water activation and absorption due to smaller mass.
- Acts to improve water penetration abilities.
- Reduces the use of fertilisers, herbicides and pesticides as a result of improved nutrient uptake.

Code	Dimensions (CM)	Qty per Pack
FLO250	Flourish Biostimulant 250ml	30
FLO1L	Floursih Biostimulant 1L	12
FLO2L	Flourish Biostimulant 2L	1
FLO5L	Flourish Biostimulant 5L	1

# SOIL AMENDMENTS & FERTILISERS

## PINE BIOCHAR (HIGH BET)

Recommended as the main soil conditioner for all organic horticulture, including vegetables, fruits, flowers and herbs, etc.

Biochar revitalises your soil by boosting nutrient transfer, increasing soil organic matter by providing the ideal environment for soil micro-organisms to flourish.

Biochar has a huge surface area made up of hundreds of micro pores. This structure provides a long term soil amendment that retains nutrients and moisture making them more readily available to soil microbes to exchange with the plants roots. As a result far less nutrient inputs are required.

Pine Biochar (High BET) is a organic soil conditioner with a very high BET (surface area). 386m<sup>2</sup>/g. BET is a commonly used standard for measuring surface area of solids.

The higher BET increases the available micro-pores in Pine Biochar which significantly increases the surface area and reduces the application rate compared to standard biochar by 50%. This offers several key improved benefits, including:

- Reduces application rates compared to standard biochar.
- Allows for an increase in the availability and retention of nutrients in the soil for soil microbes to exchange with the plants roots.
- Helps repair damaged soils by encouraging soil microbe population growth and resultant organic matter.
- Aids in improved plant growth.

Code	Dimensions (CM)	Qty per Pack
PB2	Pine Biochar Organic Soil Conditioner 2.5 Litre	1
PB5	Pine Biochar Organic Soil Conditioner 5 Litre	1
PB25	Pine Biochar Organic Soil Conditioner 25 Litre	1
PB1000	Pine Biochar Organic Soil Conditioner 1000 Litre (BULK BAG)	1

## NATURAL LIQUID FERTILISER

Organic Fertiliser is a natural, organic, liquid fertilizer based on special fermentation technologies.

The major components include live micro-organisms, ocean fish essences and other organic components.

It is rich in nitrogen, phosphorus, potassium, active organic organisms, micro-nutrients and natural growth enzymes.

Code	Dimensions (CM)	Qty per Pack
BB123	Biochar Natural Organic Liquid Fertiliser 300ml	30
BB121	Biochar Natural Organic Liquid Fertiliser 1L	12

## ORGANIC WOOD VINEGAR

# Wood Vinegar

Organic Wood Vinegar is a reddish-brown liquid, obtained by condensing the water volatile organics, released during wood pyrolysis.

Wood Vinegar is made up of about 89% water and numerous organic components, including organic acids, phenols, ketones, aldehydes, alcohols etc.

Wood vinegars are now widely used in organic farming, horticulture, forestry, florists, animal husbandry and human medical care offering a host of differing benefits depending on dilution.

Code	Dimensions (CM)	Qty per Pack
WV250	Wood Vinegar 250ml	30
WV1L	Wood Vinegar 1L	12
WV2L	Wood Vinegar 2L	1
WV5L	Wood Vinegar 5L	1

## BIOFEED PLANT FOOD/COMPOST TEA

# Biofeed

YOUR PLANTS WILL LOVE YOU FOR IT

**NEW**

Biofeed is a high quality, nutritionally balanced organic compost tea/plant food for vegetables, flowers, indoor plants, plants in transit, trees, grass, and shrubs, etc.

Biofeed compost tea is an organic plant food made from HOT composting animal manures and hay baleage.

It is a rich organic liquid that your plants will love you for.

It stimulates bioactivity in the soil through its natural enzymes and micro-organisms.

Code	Dimensions (CM)	Qty per Pack
BIOF500	Biofeed 500ml	8
BIOF1L	Biofeed 1L	4
BIOF25L	Biofeed 2.5L	1

# fodda

feeding the earth

### SOIL ENHANCER

Fodda Natural Soil Enhancer provides the ideal start for chemical free growth of new plants.

It helps detoxicate the soil of any remaining chemical residue from artificial fertilisers and enhances the growth of beneficial soil micro-organisms.

It helps prepare the soil for planting and stimulates rigorous reproduction of miro-organisms around the plants roots.

NPK of 0.5/1/2

Organic matter: 60-70%

### GENERAL FERTILISER

Fodda Natural General Fertiliser feeds the plants with all the major elements in just the right quantities and has over 45 trace elements to promote healthy growth.

NPK of 1.5/4/5

Calcium: 14.5%

Magnesium: 0.6%

Sulphur: 2%

Silica: 12%

Organic

Matter: 25%

Code	Dimensions (CM)	Qty per Pack
FODSE3	Soil Enhancer 3kg	4
FODGF5	General Fertiliser 5L	4
FODGF10	General Fertiliser 10kg	1

## DEBUG DIATOMACEOUS EARTH

5504

DEBug is used to kill and control sucking, chewing and crawling insects. It is a mechanical insect control - upon contact, the fine powder absorbs lipids from the waxy outer layer of the exoskeleton and causes the insect to die from dehydration. Great for slugs, snails, aphids, caterpillars, earwigs, beetles, fruit flies, borers, thrips and more....

Our DEBug is made from natural, fresh water fossil shell flour. It is food grade, fresh water, non-toxic, non-staining, odorless and environmentally friendly.

BioGro certified for Crop Management and Soil & Plant Nutrition.

Code	Dimensions (CM)	Qty per Pack
DE200	DEBug Puffer Bottle 200g	25
DE400	DEBug 400g Applicator Bottle 400g	10
DE500	DEBug Resealable Bag 500g	1
DE1000	DEBug Resealable Bag 1kg	1
DE2000	DEBug Resealable Bag 2kg	1
DE20	DEBug Bulk Bag 20kg	1

# DEEM INSECT SPRAY

# deem

**Insecticide - Miticide - Fungicide**

DEEM is an organic insect spray designed to repel and control insects, nematodes, mites and fungal diseases. Combining Organic Food Grade Diatomaceous Earth and cold pressed Neem oil in a convenient ready to use spray.

The Neem oil in DEEM repels insects and should any reach the plant the Diatomaceous Earth kills the insects by mechanical abrasion. Because it is organic there is no residue build up or insect resistance. In addition, there is no with holding period for fruit an vegetables.

Combining two effective products in one, DEEM is a unique blend that effectively controls and kills over 200 species of insects, including aphids, mites, scale, nematodes, leaf hoppers, white flies, caterpillars, mealybugs, thrips, fruit flies, earwigs, ants, slugs and snails and more...

Also effective against: Rot, Mildew, Rust, Scab, Leaf spot, Blight

Non-toxic to humans, birds, earthworms and animals.

No with holding period.

Code	Dimensions (CM)	Qty per Pack
DEEM5	DEEM Triple Action Spray 500ml	15
DEEMR	DEEM Triple Action Re-fill 500ml	each
DEEM2L	DEEM 2 Litre Concentrate (Dilute 1:3)	each
DEEM5L	DEEM 5 Litre Concentrate (Dilute 1:3)	each

# REPELEM INSECT REPELLENT SPRAY

REPELEM combines the proven strong natural repellency of organic Cold Pressed Neem Oil and Garlic Essential Oil in a ready to use spray or concentrate to dilute.

The dual action of these two complementary products increases effectiveness significantly and is designed to repel insects including aphids, mites, nematodes, leaf hoppers, white flies, caterpillars, mealybugs, thrips, fruit flies, earwigs, ants, slugs and snails.

REPELEM leaves no residue on plants; especially important for ornamental plants, flowers, vegetable crops, fruit crops, etc.

Also effective in repelling fungal diseases.

Non-toxic to humans, birds, earthworms and animals.

No with holding period.

Code	Dimensions (CM)	Qty per Pack
REPEL5	REPELEM Spray 500ml	15
REPELR	REPELEM Spray Refill 500ml	each
REPEL 2L	REPELEM 2 Litre Concentrate (Dilute 1:4)	each
REPEL 5L	REPELEM 5 Litre Concentrate (Dilute 1:4)	each
REPEL 10L	REPELEM 10 Litre Concentrate (Dilute 1:4)	each
REPEL 20L	REPELEM 20 Litre Concentrate (Dilute 1:4)	each

# WEEDEM WEED KILLER SPRAY

WEEDEM is a non-systemic organic weedkiller designed to rapidly desiccate and kill annual weeds and grasses.

It controls broad leaf weeds, grasses, clover, moss, algae, lichen and liverwort.

Combining the dual action effects of organic vinegar and fatty acids to control and suppress weeds.

It is formulated to kill weeds by naturally destroying the leaf cuticle causing cell leakage and rapid plant death.

As with all natural products, WEEDEM is non-systemic and only kills the area of the plant that is sprayed, not the root. Regular treatment is required to keep the weeds at bay.

WEEDEM has little residual soil activity, so is safe to use throughout the garden

Non-toxic to humans, birds and animals.

Code	Dimensions (CM)	Qty per Pack
WEED5	REPELEM Spray 500ml	15
WEEDR	REPELEM Spray Refill 500ml	each
WEED2L	REPELEM 2 Litre Commercial	each
WEED5L	REPELEM 5 Litre Commercial	each
WEED10L	REPELEM 10 Litre Commercial	each
WEED20L	REPELEM 20 Litre Commercial	each

# SLUG NO MORE SLUG REPELLENT

**NEW**

Slug No More is an effective eco-friendly product for repelling slugs and snails.

Made from raw New Zealand natural sheeps wool that is shredded and then compressed under pressure into pellets. The process of compaction heats up the pellets and reduces the moisture content.

When wetted the pellets expand and the minute wool fibres self-felt and act as barbs irritating and repelling slugs and snails.

The wool also absorbs moisture from the slugs/snails underside (foot).

Code	Dimensions (CM)	Qty per Pack
SNM2	Slug No More 2.5L	each
SNM5	Slug no More 5L	each
SNM10L	Slug No More 10L Pail	each
SNM25	Slug No More 25L	each

# OTHER GROWING PRODUCTS

## WOOL BIOMATS

WOOL  
BioMat

Our Wool Mulch/Weed Mats are made from 100% New Zealand Recycled Sheeps Wool.

Wool BioMats have a 400gsm thickness and are needled punched for strength and durability.

They can be used around shrubs, trees and other garden plants and are ideal for the establishment of young plants and are fully biodegradable, suppress weeds, help retain soil moisture, insulate and regulate soil temperature, release natural nutrients into the soil on breaking down and are a practical option to reduce soil erosion.

Our Wool Biomats are also used extensively in hydroponic growing of microgreens, etc. Sheeps wool has been shown to provide the highest yield of any inert growing media.

Code	Dimensions (CM)	Qty per Pack
WM250	250 x 250mm Squares	each
WM400	400 x 400mm Squares	each
WBM250	250 x 250mm Squares	10
WBM400	400 x 400mm Squares	10

WM1212	1200mm Roll x 12m Length	1
WM625	600mm Roll x 25m Length	1

## BIOPINS

# BioPins

Our Biodegradable Pins made in New Zealand from from Polymaize; afully biodegradable, natural and renewable materials (mainly corn starch). They contain no crude oil based plastic at all.

Over time living organisms transform Polymaize into water, carbon dioxide and fertile humus leaving no toxic or synthetic residue or waste in the soil.

Secures mulch and weed mats, seeding mesh, grass turf, etc. No maintenance - once installed mats and pins will gradually breakdown and absorb into the soil.

Easy to install with a large driving head giving better security. Won't bend nor easily pull out like wire pins.

Code	Dimensions (CM)	Qty per Pack
BP120	Biodegradable Pins 120mm	each
BP120P	Biodegradable Pins 120mm (Bag)	12

## PLANT TAGS

Yellow flexible plastic plant tag .  
Size: 48mm wide x 68mm high.

Code	Dimensions (CM)	Qty per Pack
PTY60	Plant Tag	each
PTY60P	Plant Tag (Pack)	20

# BAMBOO FIBRE GLOVES

Our Bamboo Fibre Garden Gloves are made primarily from eco-friendly natural material to keep your hands cool and dry during all your gardening tasks.

The Bamboo fibre provides hand protection while minimizing the impact on the environment. The palm is coated with foam latex/ nitrile for a better grip and water protection. They are anti-bacterial and anti-fungal.

Because of their lightweight and breathability, these Bamboo gardening gloves are super comfy.

Code	Dimensions (CM)	Qty per Pack
BGG13XS	Bamboo Fibre 'Green' Gloves (Extra-Small)	pair
BGG13S	Bamboo Fibre 'Green' Gloves (Small)	pair
BGG13M	Bamboo Fibre 'Green' Gloves (Medium)	pair
BGG13L	Bamboo Fibre 'Green' Gloves (Large)	pair
BGG13XL	Bamboo Fibre 'Green' Gloves (Extra-Large)	pair

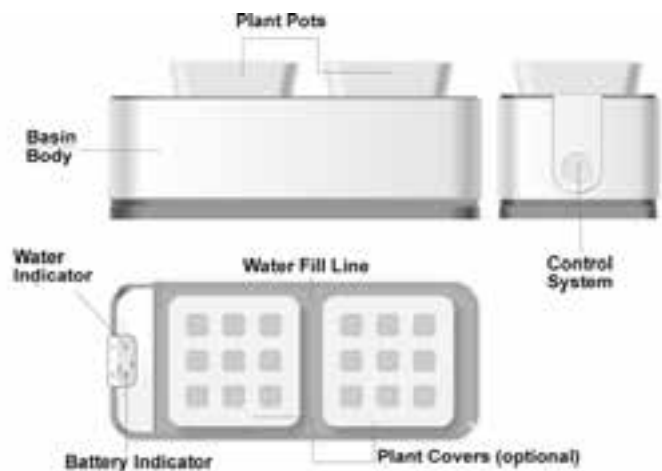

## MINI SMART GARDEN

The Mini Smart Garden is the perfect combination of intelligent control technology and hydroponic planting techniques. It is a unique indoor gardening product that is clean and green.

The pots having an optional multi-cell planting cover so are great for growing Microgreens, Bulbs, Seeds and Herbs for transplanting or use in the kitchen. The non-soil planting media can be cleaned and re-used multiple times. The control system also has a clever reminder to let you know when to add more water.

Code	Dimensions (CM)	Qty per Pack
MSG	Mini Smart Garden - Hydroponic	each

## EXPANDABLE HOSES

High Quality expandable garden hose that can automatically expand up to 3 times it's original length when the water is turned on then retracts to original length when the water is turned off. Includes a 7-Function spray head.

Super strong and durable, yet ultra light weight. Twist, tangle and kink free. Easy to handle, hangs and stores anywhere. Strengthened polyester webbing, UV resistant. Tough silicon inner tube
